

BACK PACK BLOWER

Bannerman's BA-402-K Back Pack Blower is packed with power, yet it's lightweight, easy to handle and economical to operate.

Ideal for blowing leaves out of shrubbery, hedges, around patio's, seating areas in stadiums or arenas, blowing snow off of steps and walkways, grass clippings, thatch and pine needles. Blow dry tennis courts or play areas. Also great for roofing contractors pre-cleaning and drying off roof areas for repair.

These fully portable units can save hours of back breaking work and lessen the danger of damaging the shrubbery of other plants by raking in planted areas.
