

POLY-CAP Protective Fence Guard

Many ball Parks around the country have discovered the advantages of using **Poly-Cap** to edge their fences. **Poly-Cap** provides visibility, protection, durability, and aesthetics at an affordable price.

Join the many universities, colleges, high schools, and park & recreation departments who enjoy the benefits of **Poly-Cap**.

VISIBILITY – Bright yellow **Poly-Cap** adds visibility to your ballpark fences, clearly defining the field for players, coaches, and umpires. As players approach the perimeter, they are far more likely to see a fence with **Poly-Cap** installed.

PROTECTION – **Poly-Cap**, when installed over the top of a chain link fence, covers the sharp edges of the fence and provides a smooth round surface that won't tear clothing. Most importantly, **Poly-Cap** protects your players from injuries caused by running into or falling over the fence. **Poly-Cap** is also used to decrease liability on shorter crowd control fences around the park.

DURABILITY – **Poly-Cap** is made from heavy-duty U.V. protected polyethylene, designed to remain flexible, retain its shape, and withstand the elements. **Poly-Cap** will offer protection for years to come. Currently on fields for over seven years.

BEAUTIFICATION – Aesthetically pleasing, **Poly-Cap** provides a professional "finished" look to any park, at an affordable price.

INSTALLATION –

To apply **Poly-Cap**: simply unroll the tubing next to the fence, measure and cut to fit between fence posts which extend above chain link height, (for best results

install over the fence posts when possible), with one person in front holding the **Poly-Cap** in position, and one person on

each side of the fence, spread apart by hand, or use flat "L" shaped crowbars, finally snap into place while moving forward. After installation, secure the **Poly-Cap** to the fence with U.V. protected ties every 3 to 5 feet.
